WORK EXPERIENCE

Freelance Full-Stack Engineer Aug 2025 - Present Walker's Doughnuts, Melbourne, Australia

- Architected, built, and continue to maintain FriendChise, a production multi-tenant SaaS platform used by a real Walker's Doughnuts franchisee, leading full-stack development and an open-source community of 20+ contributors.
- Developed scalable React, Node.js, TypeScript, and JavaScript applications, emphasizing reusable components, maintainability, and responsive user experiences.
- Implemented a React/Next.js admin dashboard with log tracking, user-count graphs, and feedback collection so the founder can monitor usage, errors, and misuse.
- Spearheaded the UI/UX redesign of the franchise management dashboard, utilizing Figma to create interactive prototypes that improved user workflow efficiency by 40%.
- Designed REST-style and tRPC APIs with Node.js, Javascript, and TypeScript, utilizing React for frontend integration, PostgreSQL, Prisma, Redis caching, and Auth.js for secure tenant data isolation across franchise locations.
- Built automated CI/CD pipelines with GitHub Actions, integrated Playwright testing, Sentry monitoring, and Vercel deployments to improve production reliability.
- Reviewed 50+ pull requests, provided technical feedback, and mentored contributors to maintain consistent code quality across a distributed open-source project.
- Used AI-assisted development tools (Cursor, Claude, ChatGPT) for implementation, debugging, testing, documentation, and code review while validating outputs through manual testing and engineering best practices.

Warehouse Inventory Systems Consultant Dec 2023 - Present Echt Apparel, Melbourne, Australia

- Redesigned third-party WMS inventory tables, turning 2-person tasks into 1-person tasks and roughly doubling retrieval and movement speed.
- Documented calculation logic, filtering rules, and edge cases to simplify onboarding for new warehouse staff.
- Reduced table complexity enough to halve onboarding time and lower error rates before the peak Christmas sales period.

SELECTED PROJECTS

FriendChise - Franchise Management SaaS Mar 2026 - Present V2 - Live

- Shipped a production web application using Next.js, TypeScript, PostgreSQL, and Prisma for a real Walker's Doughnuts franchisee.
- Designed authentication, role-based access control, and multi-tenant architecture supporting secure franchise isolation and scalable future expansion.
- Automated deployment pipelines with GitHub Actions and Vercel, plus Sentry monitoring and error tracking for production reliability.
- Collaborated directly with business stakeholders to gather requirements, prioritise features, iterate rapidly, and deliver production-ready software.
- Created reusable React UI components and workflows that improved operational efficiency while reducing onboarding time.

DevTasks - Developer Tool Suite Jun 2026 Open-source React/Vite project

- Merged PR #274 adding a favorites layout for Dev Utilities with browser persistence and unique-card handling.
- Merged PR #226 building a config-driven sidebar with route-aware persistence and an animated collapse interaction.

QA Wolf Technical Assessment Jan 2026 Automated Testing & Web Scraping

- Built a Node.js and Playwright automation tool to validate Hacker News article sort order.
- Progressed to the final paid interview stage after placing among the top candidates from thousands of applicants. (220 AUD)

Warehouse Management System Redesign Dec 2023 Database Schema Consulting - Warehouse Inventory

- Simplified inventory tables so one person could handle tasks that previously required two people, with no loss in speed.
- Doubled retrieval and movement speed while halving onboarding time and lowering error rates before the peak Christmas sales period.

EDUCATION

Bachelor of Computer Science 2021 - 2025 (Part-Time) RMIT University

- Coursework: Python, Computer science theory, Data Structures & Algorithms, Software Engineering/design, Database Systems, Object-Oriented Programming, System Design.
- GPA: 3.6.

TECHNICAL SKILLS

- Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
- Backend: Node.js, Express.js, tRPC, Prisma
- Databases & Caching: PostgreSQL, MongoDB, Redis
- Testing & Quality: Playwright, Vitest, Jest, Sentry
- DevOps & Tools: Git, GitHub Actions, CI/CD, Vercel, Docker

OPEN SOURCE CONTRIBUTIONS

- FriendChise: Maintainer of FriendChise, reviewing pull requests, mentoring contributors, and managing feature development across 10+ contributors.
- DevTasks - Contributed multiple accepted pull requests introducing reusable React components and configurable UI architecture.

COMPETITIVE PROGRAMMING

- LeetCode: 200+ problems solved, including 180+ completed before AI tools became common, demonstrating a strong foundation in logic, structured thinking, and core CS fundamentals, with a demonstrated interest in utilizing AI-assisted development tools.
- HackerRank: completed all React and TypeScript courses, reaching the highest React rank and reinforcing frontend fundamentals.

PORTFOLIO

- **Portfolio:** ivantran-2001.github.io (live demos and technical write-ups)
