WORK EXPERIENCE

Freelance Full-Stack Engineer

Aug 2025 - Present

Walker's Doughnuts, Melbourne, Australia

- Architected and shipped FriendChise, a production multi-tenant SaaS supporting a real Walker's Doughnuts franchisee with 10+ active contributors.
- Built role-based access control, task management, and location coordination features that cut onboarding time by 50% for rotating shop staff.
- Implemented a React/Next.js admin dashboard with log tracking, user-count graphs, and feedback collection so the founder can monitor usage, errors, and misuse.
- Designed REST-style and tRPC APIs with PostgreSQL, Prisma, Redis caching, and Auth.js for secure tenant data isolation across franchise locations.
- Automated CI/CD pipelines, Sentry monitoring, and Vercel deployments to maintain 99%+ uptime across production releases.
- Reviewed 50+ pull requests and answered contributor questions to keep feature delivery consistent across a distributed open-source team.

Warehouse Inventory Systems Consultant

Dec 2023

Echt Apparel, Melbourne, Australia

- Redesigned third-party WMS inventory tables, turning 2-person tasks into 1-person tasks and roughly doubling retrieval and movement speed.
- Documented calculation logic, filtering rules, and edge cases to simplify onboarding for new warehouse staff.
- Reduced table complexity enough to halve onboarding time and lower error rates before the peak Christmas sales period.

SELECTED PROJECTS

FriendChise - Franchise Management SaaS

Mar 2026 - Present

V2 - Live

- Shipped a production web application using Next.js, TypeScript, PostgreSQL, and Prisma for a real Walker's Doughnuts franchisee.
- Implemented authentication flows, role-based access control, and multi-tenant tenant separation across franchise locations.
- Automated deployment pipelines with GitHub Actions and Vercel, plus Sentry monitoring and error tracking for production reliability.
- Collaborated directly with stakeholders to gather requirements, rank features, and deliver production-ready solutions.
- Created reusable React components and workflows that improved shop operational efficiency and reduced onboarding overhead.

DevTasks - Developer Tool Suite

Jun 2026

Open-source React/Vite project

- Merged PR #274 adding a favorites layout for Dev Utilities with browser persistence and unique-card handling.
- Merged PR #226 building a config-driven sidebar with route-aware persistence and an animated collapse interaction.

QA Wolf Technical Assessment

Jan 2026

Automated Testing & Web Scraping

- Built a Node.js and Playwright automation tool to validate Hacker News article sort order.
- Reached the paid final-candidate round, earning AUD \$220 after placing in the top 15 out of thousands of applicants.

Warehouse Management System Redesign

Dec 2023

Database Schema Consulting - Warehouse Inventory

- Simplified inventory tables so one person could handle tasks that previously required two people, with no loss in speed.

- Doubled retrieval and movement speed while halving onboarding time and lowering error rates before the peak Christmas sales period.

EDUCATION

Bachelor of Computer Science

2021 - 2025 (Part-Time)

RMIT University

- Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Object-Oriented Programming, System Design.
- GPA: 3.6.

TECHNICAL SKILLS

- Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS
- Backend: Node.js, Express.js, tRPC, Prisma
- Databases & Caching: PostgreSQL, MongoDB, Redis
- Testing & Quality: Playwright, Vitest, Jest, Sentry
- DevOps & Tools: Git, GitHub Actions, CI/CD, Vercel, Docker

OPEN SOURCE CONTRIBUTIONS

- DevTasks - Developer Tool Suite (Jun 2026): merged PR #274 adding a favorites layout for Dev Utilities with browser persistence and unique-card handling; merged PR #226 building a config-driven sidebar with route-aware persistence and an animated collapse interaction.

COMPETITIVE PROGRAMMING

- LeetCode: 200+ problems solved, including 180+ completed before AI tools became common, reinforcing logic, structured thinking, and core CS fundamentals.
- HackerRank: completed all React and TypeScript courses, reaching the highest React rank and reinforcing frontend fundamentals.

PORTFOLIO

- More projects: ivantran-2001.github.io.
